

if you are...

currently at the start of your journey into biomedical science and want to find out more

Biomedical scientists conduct over 1 billion diagnostic tests in the UK each year. Their results provide the basis of over 75% of diagnoses in the NHS.

Biomedical science degrees focus on human biology and disease. You build scientific knowledge and learn how to investigate, diagnose, monitor and treat different human diseases, alongside developing practical laboratory skills.

Studying a four-year IBMS Accredited BSc Biomedical Science degree programme (or IBMS Accredited level 6 degree apprenticeship) with a clinical placement that includes completion of the IBMS Registration Training Portfolio is the quickest route to registration as a biomedical scientist.

To work as a biomedical scientist in the UK you are legally required to register with the Health and Care Professions Council (HCPC).

TO REGISTER, YOU MUST COMPLETE

- ✓ an IBMS Accredited biomedical science degree or apprenticeship (or HCPC approved Healthcare Science/ Life Sciences degree)
- the IBMS Registration Training Portfolio in an IBMS approved training laboratory and be awarded an IBMS Certificate of Competence
