3 Science Square, Newcastle Helix  
Newcastle Upon Tyne, NE4 5TG

And via Zoom

**Registration and coffee** **9.30 – 10.00**

**Lecture** **10.00 – 11.00**

Dr Nigel Brown, Head of Toxicology Service at Wansbeck General Hospital.

*'A different way to die from explosives'*

Dinitrophenol is an industrial chemical used in production industrial chemicals including explosives. It has been used as a dietary aid for some years and has become popular with body builders. It has been linked to fatalities and the sale of the chemical is due to be restricted in the UK later this year. The talk will also include the mechanism by which dinitrophenol acts on the body.
