Start your application today!

As a member of IBMS, you’re already part way to becoming registered with the Science Council.

The application process involves filling in a form demonstrating how you meet the competences for the relevant professional award.

You will also need to provide details of a supporter (usually your line manager) who can vouch for your skills and experience.

Apply through the IBMS at www.ibms.org/sciencecouncilapply

Alternatively, if you would like to apply for RSciTech or RSci, you can do so directly through the Science Council at sciencecouncil.org/apply.

“Registration with the Science Council has proven to my employer that I am a skilled and professional scientist.”

Get in touch

Contact the IBMS Professional Services Manager on 0207 713 0214 ext 141 or email christianburt@ibms.org.

Or you can contact the Science Council registration team on 020 3434 2020 or at registration@sciencecouncil.org.
Professional registration captures the knowledge and experience that are sought after by employers and demanded by the public, demonstrating your commitment to high ethical standards and continuing professional development.

If you’re a professional, make sure you’re registered.

Be recognised by your peers for your expertise and for your contribution to the wider science workforce.

RSciTech
Registered Science Technician

Science technicians play a vital role in our society, delivering the skilled technical support our increasingly complex infrastructure requires.

Katarzyna Sala RSciTech

Katarzyna currently works as a Research Technician in the Department of Life Sciences at Imperial College, London. She recommends RSciTech registration to anyone who wants their qualifications and experience to be recognised.

“I believe that becoming a Registered Science Technician is a great opportunity for Research Technicians, as we can be nationally recognised by colleagues and it can help us to advance in our careers.”

RSci
Registered Scientist

The Registered Scientist award provides recognition for those in scientific and higher technical roles as professionals in their field.

Katy Bisson RSci

Katy is an Associate Practitioner in Cellular Pathology at Jersey General Hospital. She sees professional registration as way to increase professional recognition for laboratory support staff.

“Becoming a Registered Scientist has improved my professional status and career progression; it has given my employer and colleagues the assurance that I am committed to professional development in a scientific field.”

CSci
Chartered Scientist

Chartered Scientist provides chartered status for all scientists: recognising the highest levels of professionalism and competence in science, independent of discipline.

Assoc Prof Dr Mohd Nazil Salleh FIBMS CSci

Professor Salleh is Dean of the Faculty of Biomedical and Health Sciences at the University of Selangor, Malaysia. He believes professional registration motivates registrants to achieve their career goals and strengthens their connection to the scientific community.

“Now that I am a Chartered Scientist, I hope to widen my network for research collaboration and to range across different sectors and disciplines.”
